- Ohio State Highway Patrol

October 24, 2016

Partners in Public Safety:

As Director of the Ohio Department of Public Safety, I am pleased to present the 2016-2019 version of Ohio Homeland Security Strategic Plan. The Strategic Plan is an all-hazards preparedness strategy designed to prevent, protect against, respond to, and recover from acts of terrorism, natural disasters, and other emergencies. The Ohio Department of Public Safety's Division of Homeland Security continues to collaborate with numerous partners in the public and private sectors to update the plan to provide our state with a strategy to best address any and all hazards that threaten the lives and well-being of Ohio's citizens and visitors.

Recent history has shown us that homeland security efforts must be designed to meet a broad array of threats, hazards, and catastrophic incidents. It is imperative that we continuously look to update our plans and strategies so that we are well prepared to confront any and all future problems. In an uncertain and often threatening environment, we must work together to achieve a high level of statewide preparedness so that we can protect the lives and interests of all Ohioans. Over the past year, critical updates were made to this Strategic Plan, to continue to achieve this desired level of preparedness among public and private sectors and across state, county, and local governments.

As a final note, I would like to express my continuing gratitude to the dedicated professionals who developed the updates to the most current version of the Strategic Plan. They have served the State of Ohio well and, as a result, we will be better prepared to confront any threats that may emerge in the future. As an overall guide for preparedness for homeland security, the Strategic Plan will continue to evolve in order to enable Ohio to respond to diverse challenges in the coming years. Thank you for your ongoing commitment to a safer Ohio.

Sincerely,

John Born, Director
Ohio Department of Public Safety

Mission Statement

"to save lives, reduce injuries and economic loss, to administer Ohio's motor vehicle laws and to preserve the safety and well being of all citizens with the most cost-effective and service-oriented methods available."

An Equal Opportunity Employer

Ohio Homeland Security

STRATEGIC PLAN

The State of Ohio is pleased to present the 2016 version of the Homeland Security Strategic Plan. The Strategic Plan provides a framework for Ohio's continuing progress toward developing and maintaining the capabilities to prevent, protect against, respond to, and recover from threatened or actual domestic terrorist attacks, major disasters, and other emergencies through well-prepared citizens, responders, and community leaders who are coordinated across disciplines and jurisdictional boundaries.

The Ohio Department of Public Safety, Division of Homeland Security coordinates the development and implementation of the Strategic Plan including planning, development, and coordination of statewide policies developed in support of public and private organizations responsible for preventing terrorism, raising awareness, reducing vulnerabilities, responding to, and recovering from terrorist acts.

The Homeland Security Strategic Plan is a living document that requires an annual critical review to remain relevant to and adjust to the changing environment. Since the first version of this Strategic Plan was released in 2007, Ohio has improved preparedness, as agencies around the state continue assessing and coordinating homeland security efforts. The Plan serves as a tool for state and local organizations to use when spending federal grant funds, by assisting these agencies in prioritizing the cost effective use of Ohio's capabilities, ensuring that the state is optimally using its resources. Everyone in Ohio has a role to play in homeland security – from individual citizens to our federal partners.

National guidance was used during the development of and subsequent revisions to the Strategic Plan. This guidance was developed as a direct result of presidential directives, aimed at creating a secure nation integrated at all levels in its preparedness. Homeland Security Presidential Directive Eight (HSPD-8) outlines a comprehensive process to prepare states in the event of a significant hazard that would require the ability to marshal all resources across the country, not just independent providers at the federal, state, and local levels.

In creating the Strategic Plan, the Department of Public Safety, Division of Homeland Security recognized the importance of instituting an inclusive planning process to ensure comprehensive input was received from across the state through the Ohio Homeland Security Strategic Plan Roundtable. The Roundtable is composed of nine advisory committees with representatives from more than 200 agencies statewide, including first responders, government officials, non-governmental organizations, and the private sector. The committees were tasked with making recommendations for revisions and implementing the objectives and steps, in support of the continued development of sustainable, risk-based, and all-hazard preparedness capabilities for the state.

The annual recommendations of the Strategic Plan Roundtable advisory committees were brought before the Homeland Security Advisory Council (HSAC) and approved by quorum vote on October 14, 2016. The HSAC is a multi-disciplinary council that advises Ohio's Director of Public Safety on matters of homeland security. After HSAC approval, the Plan was reviewed and approved by the Director of Public Safety.

The Strategic Plan was developed to protect all Ohioans. Our citizens are a key to ensuring the security of the state. All Ohioans are responsible for staying informed about the state's homeland security issues and becoming involved in making their communities more secure. Citizens are encouraged to educate themselves about personal preparedness and volunteer their services to help government agencies and non-governmental organizations achieve the homeland security goals and objectives that will make Ohio a more secure and resilient state.

Ohio Homeland Security
STRATEGIC PLAN

Mission Areas

Ohio continues to improve its preparedness by updating plans, filling identified gaps, and ensuring that all stakeholders are properly trained and exercised in the four primary preparedness mission areas:

- **Prevention** – Actions to avoid an incident or to intervene or stop an incident from occurring.
- **Protection** – Actions to reduce the vulnerability of critical infrastructure or key resources in order to deter, mitigate, or neutralize terrorist attacks, major disasters, and other emergencies.
- **Response** – Activities that address the short-term, direct effects of an incident.
- **Recovery** – Activities that include the development, coordination, and execution of human, economic, and infrastructure restoration plans.

Ohio's Strategic Plan encompasses these mission areas through seven goals, divided among the four missions. These goals provide the basic framework to develop and sustain Ohio's homeland security capabilities

Prevention

Goal 1: Strengthen Ohio's intelligence and information sharing system for the detection and prevention of threats to public safety.

Goal 2: Strengthen CBRNE (Chemical, Biological, Radiological, Nuclear, and Explosive) detection, response, and decontamination capabilities.

Protection

Goal 3: Reduce risk to statewide infrastructure by implementing the National Infrastructure Protection Plan (NIPP) and each of the supporting Sector Specific Plans (SSPs) where applicable.

Response

Goal 4: Ensure statewide response preparedness, and regional collaboration through planning, resource acquisition, training, and exercises based on, but not limited to the National Incident Management System (NIMS), the National Preparedness Goal (NPG), and the National Response Framework (NRF), and State of Ohio guidance.

Goal 5: Ensure preparedness for a health response for threats and/or incidents.

Goal 6: Promote citizen preparedness through effective preparedness planning, volunteer opportunities, and awareness programs.

Recovery

Goal 7: Strengthen infrastructure, structural, human, and economic recovery capabilities.

Ohio Homeland Security

STRATEGIC PLAN

Goal 1

Strengthen Ohio's intelligence and information sharing system for the detection and prevention of threats to public safety.

Central to any successful counter-terrorism strategy is the ability to effectively collect, analyze, and disseminate information from many different sources. Developing a streamlined information sharing system allows for the recognition of terrorism early warnings and indicators and the delivery of credible intelligence and information to individuals who make decisions in times of crisis.

Information that is vital to the detection and prevention of terrorism can come from both traditional law enforcement agencies and other sources such as citizens. Ohio incorporates specially-trained first responders into the larger homeland security community and also engages the public and private industry to provide information on potential threats, risks, and hazards. Ohio continues to work toward integrating several systems throughout the state to facilitate effective terrorism-related intelligence and information sharing and early warning investigation capabilities.

- OBJECTIVE 1.1** Continue to build capabilities of the information sharing environment in the state of Ohio by linking the Statewide Terrorism Analysis and Crime Center (STACC) with an integrated system of urban area Terrorism Early Warning Groups (TEWGs), Regional Intelligence Groups (RIGs), and Ohio's regional fusion centers – the Greater Cincinnati Fusion Center and the North East Ohio Regional Fusion Center. These groups will share timely, reliable and pertinent information and intelligence with state, local, and federal stakeholders and, within federal guidelines, with the private sector through a clearly defined process.
- OBJECTIVE 1.2** Increase the capabilities of secure local-, regional-, and state-level intelligence and information sharing systems, with the goal of interconnecting and standardizing access to these systems, so they may ultimately join the national information sharing environment.
- OBJECTIVE 1.3** Reduce identity theft to protect Ohio's citizens and to deter terrorists from falsifying their identities.
- OBJECTIVE 1.4** Increase information and intelligence sharing with the private sector and the general public.

Ohio Homeland Security

STRATEGIC PLAN

Goal 2

Strengthen CBRNE (Chemical, Biological, Radiological, Nuclear, and Explosive) detection, response, and decontamination capabilities.

As new mass-casualty terrorist tactics emerge, early detection is vital to adapting to the technological advances and malicious intent of those who wish to do our country harm. A Weapons of Mass Destruction (WMD) strike to Ohio would be an attack on “the heart of it all,” disrupting commerce and the way of life for more than 11.6 million citizens in the eighth largest state economy in the country. The Buckeye State also shares its borders with five states and has an international maritime border with Canada. We must be prepared to effectively and accurately detect illicit chemical, biological, radiological, nuclear, and explosive materials that enter our state and mitigate those threats. Additionally, more than 14 million acres of land in Ohio are used for agricultural purposes. The state’s economy and many Ohioans’ livelihoods are supported by this \$79 billion industry. Getting food from farms to dinner tables involves a complex chain of events that could be interrupted at many different stages. Because food and agriculture are such vital industries to our state, Ohio must vigilantly protect animal, plant, and food supply chains.

- OBJECTIVE 2.1** Build a system (plans, procedures, training and equipment) that ensures appropriate risk-based CBRNE detection and prevention capabilities.
- OBJECTIVE 2.2** Develop a sustainable state-wide Radiological Nuclear Detection (RND) capability to detect/ adjudicate the threat of a radiological dispersion device (RDD) or an improvised nuclear device (IND).
- OBJECTIVE 2.3** Assess, evaluate, and improve the effective functioning of current human disease detection systems to include environmental monitoring and surveillance systems.
- OBJECTIVE 2.4** Maintain an effective continuous notification and information sharing system for immediately reportable infectious human diseases.
- OBJECTIVE 2.5** Develop plans and procedures, identify, and acquire necessary resources to increase laboratory and investigative capabilities and statewide coordination.
- OBJECTIVE 2.6** Maintain and improve processes for animal and plant disease and food-borne outbreak hazards detection, reporting, and response to ensure compliance with National Incident Management System (NIMS) standards.
- OBJECTIVE 2.7** Develop standardized CBRNE capabilities in accordance with Ohio’s risk.
- OBJECTIVE 2.8** Develop guidance for standardized CBRNE decontamination plans, procedures, and training to address preparedness gaps.
- OBJECTIVE 2.9** Continue to support the implementation of the Northern Border Initiative (NBI), a multi-mission project developed as a partnership among State, Federal, local, and Canadian agencies, to protect Ohio’s international maritime border and the Lake Erie shoreline.

Ohio Homeland Security

STRATEGIC PLAN

Goal 3

Reduce risk to statewide infrastructure by implementing the National Infrastructure Protection Plan (NIPP) and each of the supporting Sector Specific Plans (SSPs) where applicable.

Ohio's government works closely with private sector representatives throughout the state to coordinate programs that maintain the safety and security of our critical infrastructure. The National Infrastructure Protection Program sets national priorities, goals, and requirements for the effective distribution of resources to ensure that our economy and public services continue in the event of a terrorist attack or other disaster. Critical infrastructure resiliency is essential in a state with the nation's greatest number of miles of interstate highway and significant rail intersections. Ohio also has two maritime borders – a 158-mile international maritime border with Canada to the north and the Ohio River, which is the largest tributary to the Mississippi River, to the south. Through risk analysis and the development and testing of protective programs, we are able to deter threats, mitigate vulnerabilities, and minimize consequences to Ohio's largely privately owned and operated critical infrastructure and key resources.

- OBJECTIVE 3.1** Identify security goals for each federally identified critical infrastructure sector in the State of Ohio to build an integrated system of resilient sectors by partnering with private industry.
- OBJECTIVE 3.2** Record existing and currently undocumented information pertaining to infrastructure security (e.g. Global Positioning System (GPS) location, owner and contact information, and federal sector specifics) on critical assets, systems, networks, and functions in the Infrastructure Protection (IP) Gateway or another appropriate database.
- OBJECTIVE 3.3** Assess risks, threats, and vulnerabilities through threat, vulnerability, and consequence analyses.
- OBJECTIVE 3.4** Develop and implement protective and resiliency programs for infrastructure partners.
- OBJECTIVE 3.5** Provide assistance to local Law Enforcement agencies during high priority events to increase security posture.
- OBJECTIVE 3.6** Create safer education facilities by developing prevention and protection programs.
- OBJECTIVE 3.7** Coordinate cyber security in the State of Ohio among the government, public, and private sectors to ensure that information systems are adequately protected and resilient to cyber threats and to ensure incident response capabilities exist to rapidly contain and remediate attacks.

Ohio Homeland Security

STRATEGIC PLAN

Goal 4

Ensure statewide response preparedness, and regional collaboration through planning, resource acquisition, training, and exercises based on, but not limited to the National Incident Management System (NIMS), the National Preparedness Goal (NPG), and the National Response Framework (NRF), and State of Ohio guidance.

As recent events have shown us, the effects of any terrorist incident or catastrophic occurrence can be felt worldwide, and the response may involve the entire nation, including Ohio. With policy guidance in the form of the Homeland Security Presidential Directives, Ohio recognizes the need to have a consistent response system in place to prepare for and manage incidents, regardless of where or how they occur. The National Incident Management System and the Nation Response Framework provide an outline for developing consistent plans for responding to critical incidents. It is imperative that all programs are fiscally responsible, and necessary preparedness equipment is allocated through extensive planning and prioritization based on risk and need. The effective use of plans and equipment requires that those who will be using them train and exercise regularly to ensure a rapid, efficient response effort and provide for the safety of first responders and the public.

- OBJECTIVE 4.1** Complete annual NIMS requirements.
- OBJECTIVE 4.2** The State will develop and enhance State Emergency Operations Center (EOC) functionality, management systems and procedures and provide for continuity of State EOC operations.
- OBJECTIVE 4.3** Develop a statewide enterprise approach to a sustainable business continuity program ensuring that all State agencies, boards and commissions will have Continuity of Operations Plans (COOP) and Continuity of Government (COG) capabilities.
- OBJECTIVE 4.4** All jurisdictions (State and local) will be covered by a comprehensive Emergency Operations Plan (EOP).
- OBJECTIVE 4.5** Support the collaborative efforts of local jurisdictions seeking to systematically enhance regional response capabilities.
- OBJECTIVE 4.6** Ohio will maintain a strategy for the effective building, use, and sustainment of capabilities to include those developed through the Ohio Response System (ORS).
- OBJECTIVE 4.7** Implement measures to promote the safety and preparedness levels of responders to all-hazard events.
- OBJECTIVE 4.8** Update and continue to implement the Statewide Communications Interoperability Plan (SCIP).
- OBJECTIVE 4.9** Update and maintain plans and procedures to quickly and effectively gather, confirm, utilize and release crucial safety and health information to affected and interested populations during a natural, accidental or intentional incident.

Ohio Homeland Security
STRATEGIC PLAN

Goal 5

Ensure preparedness for a health response for threats and/or incidents.

Ohio has robust systems in place for medical practitioners, hospitals, and health departments to use for disease surveillance, detection, monitoring, and reporting of disease outbreaks. Should a large-scale natural or man-made biological incident take place, it could easily overwhelm traditional health care systems. Planning for such an event involves coordinating the mass distribution of pharmaceuticals and medical surge capabilities among citizens, government agencies, non-governmental organizations, private sector industries, and both traditional and non-traditional health care systems. This coordination of efforts is critical for Ohio's medical and health preparedness which is accomplished through proactive planning and outreach.

- OBJECTIVE 5.1** From 2016 through 2019, health and medical surge plans will be integrated to ensure health preparedness.
- OBJECTIVE 5.2** A strategy for the implementation of medical countermeasures (mass prophylaxis and treatment) will be developed, including general population sites, closed pods, targeted push planning, with special emphasis on pediatrics and response personnel.
- OBJECTIVE 5.3** From 2016 through 2019, guidelines will be developed to ensure that agencies, organizations, communities, and individuals involved in responding to health threats and/or incidents understand their roles and responsibilities.
- OBJECTIVE 5.4** From 2016 through 2019, all jurisdictions will be covered by plans and procedures to effectively manage mass fatality incidents.

Ohio Homeland Security

STRATEGIC PLAN

Goal 6

Promote citizen preparedness through effective preparedness planning, volunteer opportunities, and awareness programs.

Every Ohioan serves an essential role in ensuring that our communities are prepared for a terrorist attack or catastrophic incident. State and local government, non-profit, and private sector organizations are collaborating for comprehensive evacuation, sheltering, and mass care planning across the Buckeye State. Citizens must ready themselves through personal preparedness planning, supporting readiness in their communities, and educating themselves about their role in Ohio's preparedness efforts. By planning ahead for emergencies, we can significantly minimize the consequences to individuals and families who can help the most severely affected populations.

- OBJECTIVE 6.1** The State will develop and execute a strategy for the promotion of citizen preparedness, and community emergency response teams (CERT).
- OBJECTIVE 6.2** Ensure all jurisdictions are covered by plans to care for and shelter populations that are displaced or in need during an emergency.
- OBJECTIVE 6.3** The State will assess the status of citizen notification systems throughout the state and identify gaps in the capability to alert the maximum possible population.
- OBJECTIVE 6.4** The State will support the development and enhancement of capabilities to manage volunteers and donations during an emergency.

Ohio Homeland Security
STRATEGIC PLAN

Goal 7

Strengthen infrastructure, structural, human, and economic recovery capabilities.

Strengthening recovery capabilities will mitigate damage resulting from a terrorist act or catastrophe by saving lives, reducing property losses, and restoring systems that are vital to the health and safety of Ohio's citizens. Lessons learned from nearly every terrorist incident or catastrophe remind us that Ohio must have recovery capabilities in place before an event occurs in order to reduce its long-term impact. Our economic security is dependent on our homeland security – we need both to secure our future.

- OBJECTIVE 7.1** Develop plans and guidance to ensure timely access will be provided to health care, appropriate level behavioral health interventions such as crisis counseling, psychological first aid, opiate treatment interventions, and social services for Ohio's citizens after a regional or local all-hazards event.
- OBJECTIVE 7.2** Facilitate effective mitigation and recovery activities.

This document was prepared under a grant from the U.S. Department of Homeland Security (USDHS). Points of view or opinions expressed in this document are those of the authors and do not necessarily represent the official position or policies of the USDHS.
