In an effort to better serve Ohioans before, during and after a disaster, the Ohio Department of Public Safety (ODPS) relies on strong partnerships between citizens, government, and private business. In order to strengthen these partnerships across the state, ODPS created the Ohio Public Private Partnership (OP3) program, an initiative designed to provide current information and situational awareness on disaster prevention, response, and recovery efforts to state agency and business executives, allowing decisions and resources to best support the needs of the impacted community.

Some of the OP3 private sector partners include:
